

# NSU

## Network Server Uptime

- Did you know Microsoft delivered 32 different OS patches last year for Windows 2000 alone?
- What about the 17 that became available for IE?
- Cisco released 3 DSL 675/678 router software upgrades since last November?
- Is the ongoing software/firmware maintenance taking you away from your other business duties?

### Network Server Uptime is the answer!

What is NSU? Network Server Uptime is a monthly subscription service that provides your Microsoft / Cisco / Netopia based network server equipment with ongoing configuration maintenance via a fixed price model. For a fixed monthly fee, Butler Consulting will provide the following services working around your normal business hours.

Emergency Repair Disk Updates  
Virus Scan running and current  
Server Hardware BIOS updates  
Disk Defragmentation

OS Security Fixes / Compatibility Updates  
Backup Confirmation / Test Restore  
Server Hardware Driver / Firmware Updates  
Complete Monthly Report in PDF format

Butler Consulting is conveniently located on the west side of Colorado Springs near Rockrimmon and Centennial. Give us a call for a free analysis of your network server and a personalized NSU quote.
